Die Elsner+Flake Digital Library

Dieser Schriftkatalog für Apple Macintosh und IBM PC kompatible Fonts enthält 1643 Fonts namhafter Schrifthersteller und -designer. Sie finden Schriften von ATF, ITC und Bauer Types S.A.. Einige Originalschriften der Linotype Library GmbH sind nur bei Elsner+Flake erhältlich. In diesem Zusammenhang weisen wir besonders auf die für den Mengensatz entworfene Marconi und Edison von Prof. Hermann Zapf und auf die Schriften Demos, Hollander, Praxis und Swift des niederländischen Designers Gerard Unger hin.

Technische Grundlagen

Elsner+Flake Schriften basieren in der Regel auf der IKARUS Outline Technologie. Daten, die nicht in unseren eigenen Studios entstanden sind, haben wir u.a. von Herstellern wie ITC, Linotype und Esselte Letraset übernommen. Sie wurden von unseren Designern unter Berücksichtigung visueller und typographischer Maßstäbe der heutigen Fonttechnologie angepaßt und sind mit wenigen Ausnahmen als Macintosh PostScript und PC PostScript/TrueType Fonts erhältlich.

Typografische Unterschiede

Alle Text- und Displayschriften enthalten umfangreiche Kerningtabellen. Versal- und Minuskelakzente sind, wo es erforderlich ist, individuell gestaltet. Kursive Groteskschriften wurden von Originalvorlagen gefertigt. Elektronische Modifikationen finden Sie nur dann, wenn dieses vom Entwerfer vorgegeben wurde. Zahlreiche Schriftfamilien sind durch Kapitälchen ergänzt. Alle Buchstaben sind von höchster Genauigkeit und größtem Detailreichtum. Sie lassen sich auch in Auszeichnungsgrößen anwenden und bei entsprechender Umsetzung in jeder Größe in Folie schneiden.

Ergänzung des Angebotes

Als ergänzende Serviceleistung bieten wir den Entwurf, die Digitalisierung von Haus und Sonderschriften sowie die Modifikation vorhandener Schriftentwürfe an. Zur Zeit wird die Bibliothek um Schriften im CE (Central European) Layout sowie kyrillische und griechische Zeichensätze erweitert. Diverse hebräische Schriftfamilien sind bereits im Angebot, die in unserem Schriftenatelier nach historischen Vorlagen neu bearbeitet wurden.

The Elsner+Flake Digital Library

This catalog lists 1643 typefaces for the Macintosh and IBM PC. Licensed and designed by world famous designers and manufacturers, you will find typefaces from ATF, ITC and Bauer Types S.A.. Additionally, we carry some originals from the Linotype Library GmbH that are available from the Elsner+Flake collection only, such as Marconi and Edison - designed by Hermann Zapf for newspaper design. We also carry Swift, Praxis, Hollander and Demos from the famous Dutch designer Gerard Unger.

Technical and Aesthetic Details

Elsner+Flake typefaces are created using IKARUS outline technology. The IK-formats of our typefaces are either from the libraries of ITC, Linotype and Esselte-Letraset or produced in our own studios in Hamburg, Germany. Before we publish a new typeface, we go to great length to make sure that our designers have adapted the original drawings to the technical requirements of modern technology. We also make sure that these new typefaces meet the requirements of good legibility and readability while maintaining the beauty of the original drawings.

The Typographic Difference

Elsner+Flake typefaces are designed to meet the demanding requirements of the European design community. Complete kerning tables guarantee that our text and display typefaces have a fine appearance and excellent legibility. Accents on caps and lower case letters are individually designed. All italics are true italics. Many typefaces are completed with Small Caps and Old Style Figures. Every character is digitized with great accuracy. This is evident when our types are sized very large - smooth curves and fine details are held.

A Growing Resource

Our library is constantly growing. Not only are we adding new Latin design in the Central European character layout to meet the demand of East European Communities, there is also a wide range of Hebrew and other non-Latin fonts in the Elsner+Flake Digital Library.
